How to register ENVI-met STUDENT

Thank you for buying the ENVI-met Student License.

With your order, you receive a license key:

STUDENT.LICX

This key will upgrade your existing ENVI-met installation to the Student Version.

The ENVI-met Student key has a fixed license runtime. After the run-time has passed, ENVI-met automatically falls back to the LITE Version.

As the ENVI-met Student License can only be obtained for one year per student, you will not be able to renew this license

The key is for you personally and must not be forwarded to any other person! It is only for your personal computers - do not install this on public computers.

Activate the license for your computer by carrying out the following steps.

1.1

Registering your Student License

1 Open „ENVI-met Headquarter“,

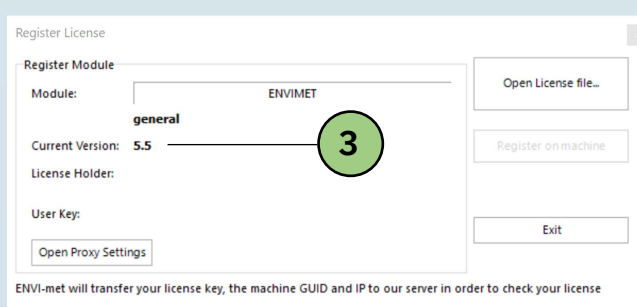

After a fresh installation, ENVI-met is working as a „Lite Version“ (1).

2 Next, go to the „System“ page. and click on „About/ Register“ (2):

3 Here, you can register your license using the provided file STUDENT.LICX

You can see the current model version of ENVI-met (3).

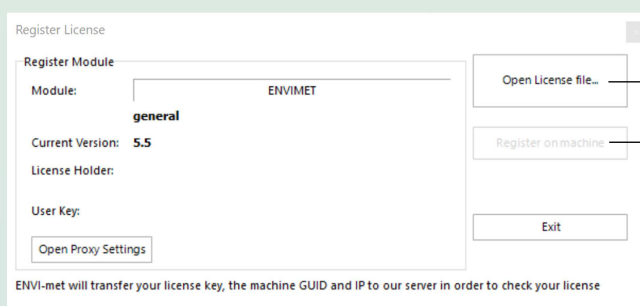

4

Next, click on (4), to open the license file (*.LICX) you have received from us.

We recommend to store this file in a save place so that you can always have access to it. After the registration process, the original *.LICX file will not be required to run ENVI-met Student.

4

5

5

Finally, click on „Register on machine“ (5) to activate the license.

You will need to close & restart all ENVI-met applications to make sure all modules are updated!

If you receive an error message telling you that the file license.edb cannot be modified, you probably installed ENVI-met into a folder where you do not have the full write access rights.

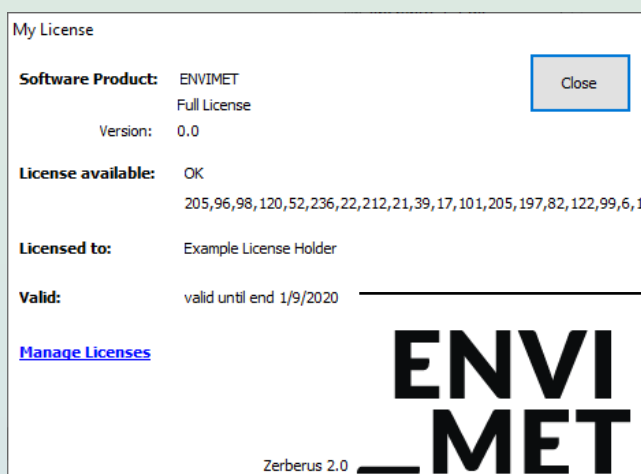

This will lead to further problems when using ENVI-met. Always install ENVI-met into a folder where you have full access rights! After restarting the Headquarter, your license information should be updated .

1.2

Showing the license details

1

To obtain details about your license, click “License Info...” on the “System” page.

Detailed information, including the license run time (1) is shown here

Note: Any changes in the registration information e.g. the name of the license holder will make the key invalid and ENVI-met will fall back to the „LITE“ version.

For support on the model activation, please contact license@envi-met.com

1.3

License managing

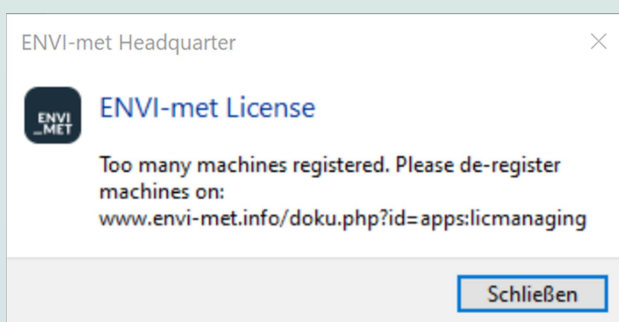

1

After you bought an ENVI-met Student License, you will get a validation email. Here, you can find your personal User Key and the license file (*.LICX)

Make sure to save them.

With your Student License you can register 1 machine. When trying to register the 2nd machine, the registration server will prompt:

In order to register the new machine, your current machine has to be de-registered first.

You can do that by navigating to:

<http://www.envi-met.info/doku.php?id=apps:licmanaging>

To gain access to your registered machine, enter your user key, which you have saved or can find in the validation email. Notice that the user key is case sensitive.

2

You can now select the licenses that you want to de-register.

Once selected, click the “remove selected machines” button and you will be able to register new machines until your license limit is reached again.

Please enter your license key (userKey) from your validation e-mail:

License managing

Your license type can register up to 1 licenses.

Select the machines you want to remove
